

ABDULLAH MOHAMED GABER

Cairo, Egypt | abdullh.gaber.dev@gmail.com | +201010440206 | Military Status : Exempted

[GitHub](#) | [LinkedIn](#)

PROFILE

Results-driven **Native Android Developer** with expertise in building scalable, high-performance mobile applications. Proficient in modern Android development using **Kotlin** and **Jetpack Compose**, with a strong foundation in **Clean Architecture**, **MVVM**, and **MVP** patterns. Skilled in integrating **RESTful APIs**, implementing **local caching**, and handling **asynchronous data streams** to deliver clean, maintainable code and responsive user experiences.

EDUCATION

Information Technology Institute (ITI)

9-Month Professional Diploma - Mobile Applications Development (Native).

Alexandria, Egypt
Oct. 2025 – July. 2026

Mansoura University

B.Sc. **Software Engineering** department.
CGPA: 3.7 / 4.0

Mansoura, Egypt
Sept. 2020 – July. 2024

PROJECTS

Pearl (Automated Skincare System) – University Graduation Project | Android / Web

Developed a native Android application using **Kotlin**, **Jetpack Compose**, and **Clean Architecture** integrated with a Laravel web management dashboard, integrated **TensorFlow** for mobile machine learning inference, **Room DB** for local caching, and **Retrofit** for secure **RESTful API** communication, Implemented real-time services and user verification utilizing **Firebase** and **Twilio**. Notably, this innovative project was **awarded** the **Best Promising Idea** in the Egypt AI & IoT Challenge 2024.

ShopIQ — Smart M-Commerce | JETS MobileX Challenge 2026 | Android

Developed a production-grade, Shopify-powered mobile commerce application using **Kotlin**, **Jetpack Compose**, and **Clean Architecture** with multi-module separation (:app, :presentation, :domain, :data). Consumed dual Shopify Storefront & Admin APIs via **Apollo GraphQL**, handled REST networking with **Ktor**, and managed local persistence using **Room DB** and **DataStore**. Integrated **Gemini AI** for an in-app shopping assistant, **Google Maps** with reverse geocoding for address selection, **Firebase** for authentication, and **Paymob SDK** for secure payment processing. Employed **MVI** pattern with optimistic UI updates, **Koin** for dependency injection, and delivered a fully bilingual (**En/Ar RTL**) experience with **Material3** dynamic theming. Built during the **JETS MobileX Challenge 2026** at ITI Smart Village.

Mongez | Android

Built an AI-powered study planner in **Kotlin** and **Jetpack Compose** following **Multi-Module Clean Architecture (MVI)**. Integrated **Firebase Auth** with **Google One Tap**, **Retrofit**, **Room DB**, **DataStore**, and **Dagger Hilt**. Features an AI-generated dynamic semester roadmap and a contextual AI study assistant grounded in courses.

GameServerEngine | Java

Engineered a real-time multiplayer game environment leveraging low-level Java **Socket Programming** and **Network IO** to establish instantaneous **client-server** communication and synchronization.

Foodaak | Android

Architected an Android meal management app using **MVP**, **Clean Architecture**, and **Dagger Hilt**, integrating **RxJava3** for reactive data streaming and **Firebase** for secure authentication.

WeatherFlavor | Android

Engineered a **Jetpack Compose** weather app adhering to **MVVM** and **Clean Architecture**, utilizing **WorkManager** and **AlarmManager** for background tasks alongside a custom **Strategy Pattern** to bypass restrictive OS **background permissions**.

Languages: Kotlin, Java, Swift, Objective-C, Dart

Android Development: Android SDK, Android Jetpack, XML views, Jetpack Compose (Declarative UI, Custom Modifiers, Layouts), Android Architecture Components, Navigation Components, Android Life Cycle, Functional Programming, Lambda Expressions, Generics, Custom Views, App Bundles.

Architecture & Design: Clean Architecture, MVVM, MVP, MVC, MVI, SOLID Principles, UI/UX Design Principles (Material Design 3, Human Interface Guidelines), App Modularization (Layered & Feature-based).

iOS & Cross-Platform: iOS SDK, SwiftUI, UIKit, Core Data, Flutter SDK, Platform Channels (MethodChannel)

Asynchronous & Concurrency: RxJava (RxJava3), Coroutines (Asynchronous Flow, Channels), StateFlow, SharedFlow, LiveData, Multithreading, Memory Management (LeakCanary, Profiling), WorkManager (Background Processing), Combine Framework, GCD (Grand Central Dispatch).

Dependency Injection & Service Locator: Dagger Hilt, Koin, Dagger2, Swinject.

Data & Offline Storage: Room, DataStore (Preferences / Proto), SQLite, Offline Storage & Caching Strategies.

Networking & APIs: RESTful APIs, JSON, Retrofit, Ktor Client, Gson, Kotlinx.serialization, WebSockets.

UI & Image Loading: View Binding, Data Binding, Coil (Kotlin-first image loading), Glide, Picasso, Lottie Animations, MotionLayout.

Testing & Quality Assurance: Unit Testing, Instrumentation / UI Testing, TDD (Test-Driven Development), JUnit4/JUnit5, Mockk, Mockito, Espresso.

Backend & Cloud Services: Firebase.

Tools & Version Control: Android Studio, Xcode, VS Code, Git, GitHub, GitLab, CI/CD Pipelines (GitHub Actions, Bitrise).

SCHOLARSHIPS & INTERSHIPS

ITI Tech-Leaps - Android (ITI & Pluralsight) | Scholarship

29 June 2022 – 18 December 2022

- **Completed an intensive, 6-month hands-on curriculum** focused on advanced Android development, data structures, algorithms, and software engineering best practices.
- **Engineered weekly technical assignments and practical tasks**, rigorously applying **SOLID** principles, **Clean Code** methodologies, and Object-Oriented Programming (**OOP**) paradigms.
- **Implemented modern Android components and version control**, heavily utilizing **Kotlin Coroutines**, advanced **Gradle** build configurations, and **Git/GitHub** workflows.
- **Technical Environment:** Java, Kotlin, **SOLID** Principles, **Design Patterns**, **Coroutines**, **SQLite/Room DB**, **Gradle**, **Android Testing & Security**.

ITI Android Summer Training 150hrs. | Scholarship

9 July 2023 – 4 August 2023

- **Architected and delivered multiple functional Android mini-projects**, rapidly translating complex theoretical concepts into practical mobile applications.
- **Developed advanced application features** by integrating robust Socket Programming, managing multi-threading environments, and implementing third-party APIs.

Route Academy | Scholarship

June, 2024 – Oct. 2024

- *4-Month Intensive Android Diploma*
- *(Java – Kotlin – XML Views – Jetpack Compose)*

LANGUAGES

- **Arabic:** Native proficiency.
- **English:** B2.
